---

We provide your film production environment

- ◆ **Complete set design and creation**
  - ◆ **In-door and out-door settings**
  - ◆ **Production management assistance**
- 

Village Guild Productions is a trade school operating in a film production environment. We can help you produce your film or video at a very reasonable price because our students create the sets, provide production support, and even act as extras in your film if you need them.

You provide the script, etc., etc. and at your option, we will create and manage set design, set changes, costume design, and other production management assistance. We also have camera, lighting, and sound recording equipment and operators available.
